

I just want to thank you Terrye, Dr. Tebbetts and your entire staff for the wonderful experience that I have had so far after my Augmentation.

My cousin Andrea was my surgery buddy and after leaving your office we went straight home. She put me in bed and I fell right to sleep. I was woken up after two hours of sleep and Andrea and my fiancé got me out of bed and into the living room to eat. I was amazed at how easy it was to get up and actually eat a full meal only two hours after my surgery. After eating we followed the instructions to a "T". The arm raises do feel really good and help tremendously with the soreness (which really isn't bad at all). A few close friends and co workers of mine had come over and could not believe that I was sitting up, eating and talking like nothing had ever happened. It was unbelievable that I had surgery that day and no one would have known. I did the dishes, some laundry and gave my dogs a bath. I even walked around my neighborhood that night with my dogs (I didn't hold the leashed though....they are too strong for me). I took a shower and went to bed around mid night and slept like a rock. Saturday morning I got right up and took a warm shower (which felt great) and got myself dressed and headed out the door for my follow up. It was really nice to sit in the waiting room with the other women who just went through the same experience that I did the day before. We all were amazed at how easy it was and everybody was on the same page. Everyone in the room all got out and did something. It was great! After my follow up, my fiancé and I went to two places to complete our wedding registries. We went to dinner and a movie. I kept up with my stretches, had good full meals and took my meds as directed and felt great. I slept great once again without the sleep aid. Sunday I got up and took a warm shower and went out the door to pick up a birthday gift for my friends son and went to his birthday party. Everyone there could not believe that I was there and moving around without any problems or signs of surgery. They thought I looked great and some of them didn't even know that I had an augmentation. They said that they looked so natural and were a great fit for my body. I couldn't be happier with the outcome and I am so glad that I waited 10 years and did my research! Thank You again for such a great experience! I would do this all over again hands down!
